DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 2-4 continue to be rejected under 35 U.S.C. 102(b) as being anticipated by Giraud (3,916,806) as presented in paragraph 7 of the Office Action dated January 31, 2001.

Response to Arguments

3. Applicant's arguments filed May 29, 2001 have been fully considered but they are not persuasive.

Drawings

The objection to the drawings has been withdrawn due to applicant's amendments to the claims.

35 USC 112

The rejection of claims 2-4 under 35 USC 112, second paragraph is withdrawn due to applicant's amendments.

35 USC 102

Applicant argues that Giraud does not disclose a "retaining threshold" because the cylinder portion of the combustion chamber and the large base of the truncated cone are the same.

Art Unit: 1764

The examiner respectfully disagrees with applicant. The structure (such as a particular shape, size or degree of slope) of the "retaining threshold" is not defined in the claims or specification. The specification defines, on page 3 of the specification, the retaining threshold as a region of intimate contact of the waste. The Giraud patent describes wherein the waste material is in intimate contact as indicated by reference (d) and in col. 11, line 58- col. 12, line 20. The rejection is maintained.

Applicant also argues that the combustion chamber of Giraud oscillates and therefore does not read on the "rotate" limitation of claim 2.

The examiner respectfully disagrees with applicant. The claim language of "rotating" encompasses "oscillate" because oscillation is turning on an axis. In addition, Giraud recognizes that oscillation is a form of rotating in col. 12, lines 31-35. The rejection is maintained.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1764

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
